Know your input data

Into math

Playing notes E E E E B D C A..

MIDI data Note number 48,46,48,46,40,32...

No1 for elise No2 ねこふんじゃった No3 god knows.. No4 君の知らない。。 ... (n=100)

Recorded MIDI data

No1 48,46,48,46,40,30,... No2 32,30,32,31,30,31,, No3 45,42,30,31,21,31,

It seems simple,,, but "REAL DATA???" error touches different input timing arranged plays different part played... different octave

"Photo-chemical" to make trigger

稀? Timing/Trigger

光で反応をおこそう

How to "trigger-in"? 1. Photo chemical reaction

脱定常状態 脱健康 脱正常

46

Chemically

2. Femtosecond laser processing Physically

Biologically

3. Biological Stress

"Photo-chemical" to make trigger Cardiovascular disease analysis by photo-chemically induced thrombus

化学反応

Injected substrate (porphyrin)

Photochemical reaction

Reactive oxygen species

Platelet activation Endothelium inflammation

100micron

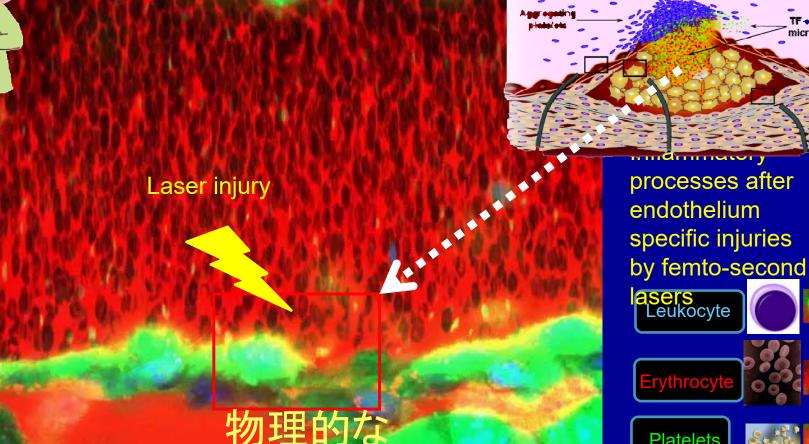

血小板

5micron

Thrombus in vivo Thrombus formation induced by photochemic reaction (ROS production)

Texas Red Dextran Hoechst CAG-eGFP mice

Cardiovascular disease analysis 心筋梗塞= by femtosecond laser manupilatoin 血管傷害を

体光操作

Tissue repair imaging

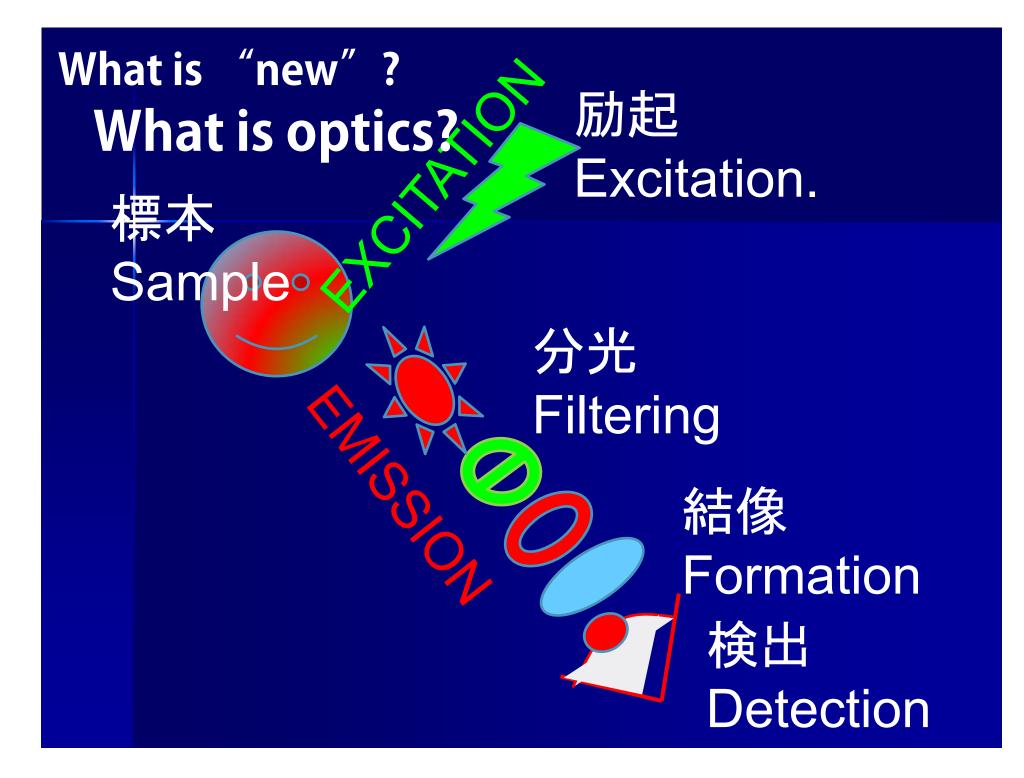

Manualy, Mechanically Injured skin 生物の炎症反応 を皮膚で観察

生体炎症反応を 再現

X100 real time⁴⁹

However, these microscope are based on old techs.

How, can you make new things?

What is optics?

標本

Sampleo

励起 Excitation.

Everything seems to be enough.

What is new?

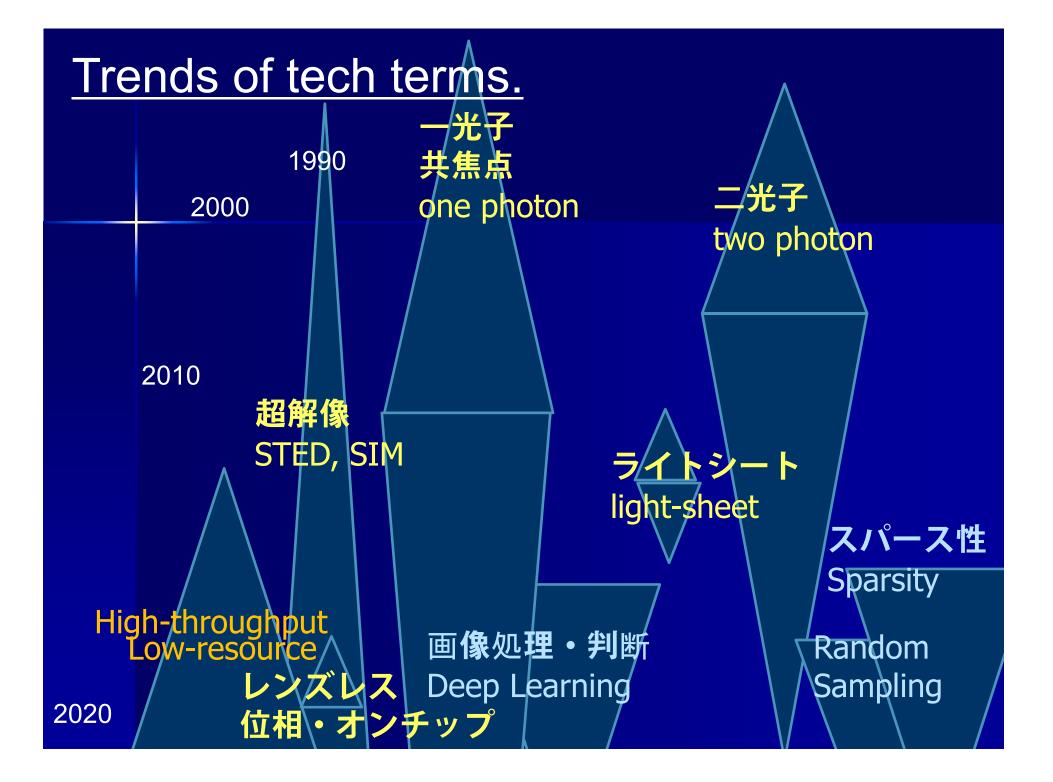

^{小口 I豕} Formation 検出 Detection

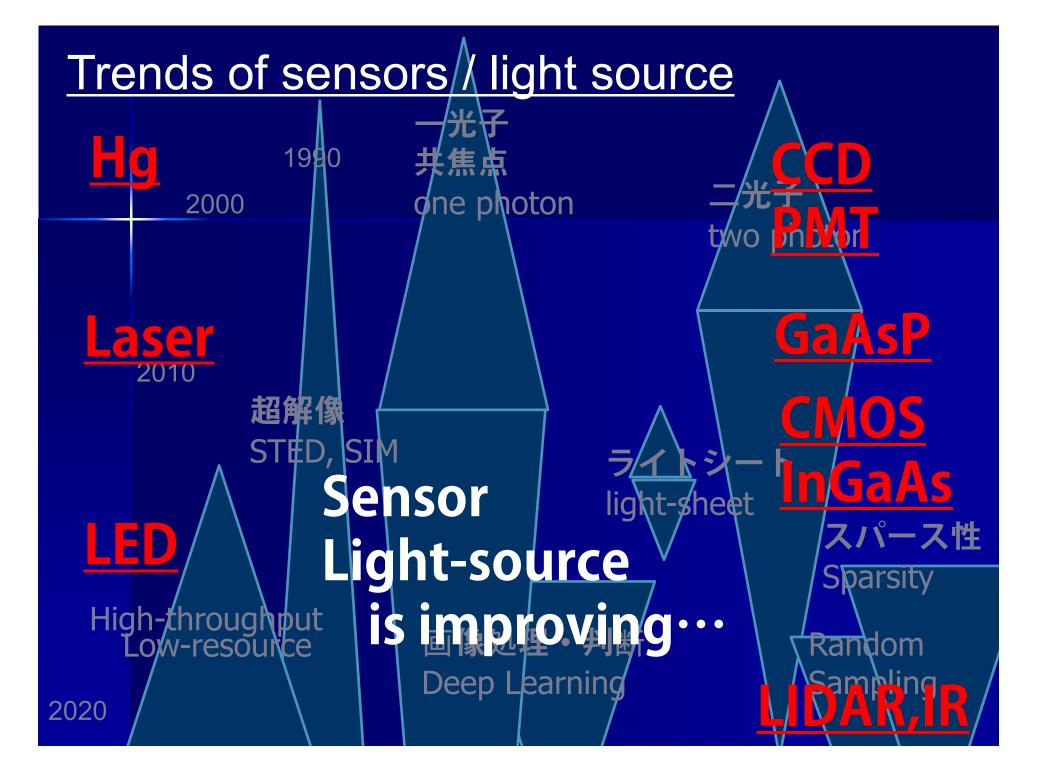

What is EV **Two photon** Edge? Improve? **FCM Advantage?** confocal Lidar **IR** sense deepfake **CMOS** photometry Superlearning resolution

What is Edge? Improve? Advantage? photometry

LiDAR IR sense Deep-fake

Two photon confocal FCM CMOS EV learning Super-Microscope =nostalgia. resolution

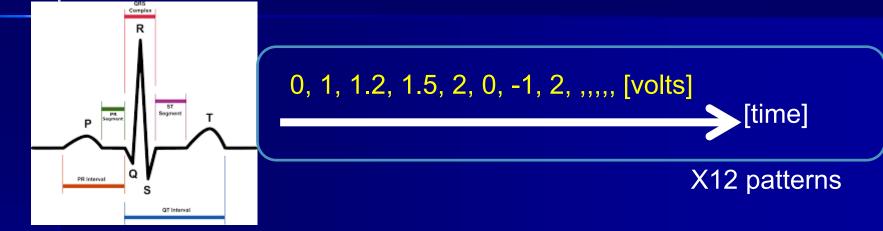

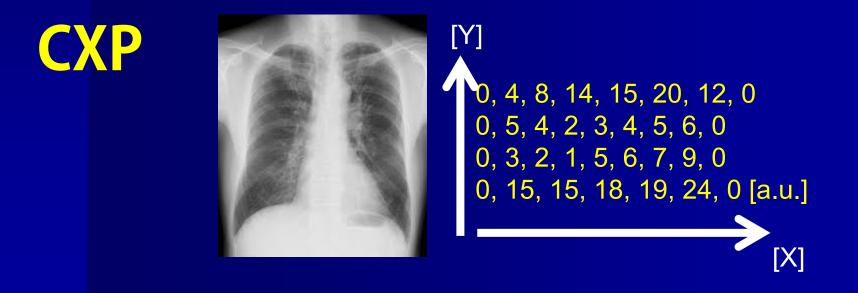

And you can add new value
